Campus Updates

- We learned today that a resident in our Rehabilitation Unit did test positive for COVID-19 as results from our first round of resident testing come in. All staff and the families of those having loved ones who may have had direct contact with this resident have been notified. If you haven't received a call from us, your loved one is not affected. This resident has been transferred to our separate observation unit in the health care center that is designed to care for COVID-19 patients. We continue the process of testing residents and staff in the Rehabilitation unit and then will conduct the second round of testing 5-7 days after.

As you all know, since March of last year, we have been conducting vitals checks on residents in this program area three times daily. We also monitor them for symptoms to help identify any changes in their conditions. We do the same for all Assisted Living and Health Care Center residents and have encouraged all Independent Living residents to self-screen daily and have provided thermometers for them to check their own temperatures. Together with wearing masks, screening staff in all program areas and following frequent cleaning and hygiene protocols, we have precautions in place to help mitigate the spread when someone becomes ill. We will keep you updated as test results are returned.
