Campus Updates

- Following up on our ongoing testing and re-testing of residents and staff, we wanted to let you know that one resident in our Health Care Center Unit did test positive for COVID-19. All staff and the families of those having loved ones who may have had direct contact with this resident have been notified. If you haven't received a call from us, your loved one is not affected. The resident has been transferred to our separate observation unit in the health care center that is designed to care for COVID-19 patients. The resident will not be able to have visitors until the specific time in the recovery unit has passed.

With the changes in guidelines from the CDC we have reached out to the Department of Health to confirm whether or not visitors on the quarantined unit are allowed. As of my sending this we have not heard back from the Department of Health. With this said, out of an abundance of caution we feel it is best to be overly cautious and we will go into quarantine in this area until we hear back.

We will send another update, as soon as we hear the final word from our contact at the Department of Health. We will also continue to retest all residents and staff in this area.
